## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of claims 1-3 in the reply filed on 05/26/2006 is acknowledged.
2. Claims 4-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method of applying a photoresist, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 05/24/2006.

### *Claim Status*

3. Claims 1-3 are pending.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lille, U.S.

Patent No. 6,725,526 B2.

Lille teaches a suspension assembly with a base, formed from silicon wafer (stiffener layer), a sacrificial layer (cushion layer), which is less stiff than the silicon wafer and subsequently formed over the silicon wafer. The silicon wafer may include
